

ESSE

WOOD HEATERS

700

TRADITIONAL LOOK
MODERN
PERFORMANCE

Riddling grate & hidden ash tray

Optional outside air

A stunning view of flames can be seen through the signature arch window of the ESSE 700, and is ideally suited to bigger fireplaces or for installation as a freestanding focal point, perfect for heating up to 110m².

With two air controls, you can change the way your ESSE 700 burns. The primary precision air control gives you impressive flames, where the bottom secondary air control works like bellows to give your fire a serious boost when needed.

With a cast iron top you can pop a kettle on top of your ESSE 700 or let your pot roast simmer away all day.

The option to top or rear flue, and bring in fresh air from outside to fuel your fire with the optional outside air kit, the ESSE 700 is ready to fit into your home.

Optional wood box:

Optional wood box

Precision Air Control

Roller Door Handle
